

# Key Communication and Dissemination Initiatives

## Early adopters Programme

### What is it?

A programme to engage educators or institutions in the early adoption of the T4H educational products

### Envisaged benefits

- Opportunity for implementing innovative products in behaviour change support education in chronic disease developed by a multidisciplinary team
- Streamlining the digital transformation of teaching and learning
- Public acknowledgement of participation in an international community of forward-thinking educators

### Expected contributions

- Input to educational products testing and iterative improvement
- Supporting the translation from English into other languages
- Input to the white paper on implementation of behaviour change support education in chronic disease

## Networking Database for Behaviour Change Education

### What is it?

A database of persons interested in behaviour change support in chronic disease

### Envisaged benefits

- Being part of an open community of stakeholders sharing a common interest on this subject
- Facilitating contacts to stimulate further educational and scientific activities and projects
- Contributing to advance the state-of-art of behaviour change support in chronic disease

### Expected contributions

- Join the database through the [T4H website](#)
- Diffuse the database to colleagues that might be interested
